 - Quick Summary...

CONSIDERATION

- RECAP - Primary Theories
 - Valuable Consideration - parting of something of marketable value, usually money.
 - Contract Consideration - consideration sufficient to create a binding obligation or agreement.
 - Promoter Benefit
 - WIS STATS §945(5)(b) 1. "Consideration" in this subsection means anything which is a commercial or financial advantage to the promoter or a disadvantage to any participant, but does not include any advantage to the promoter or disadvantage to any participant caused when any participant learns from newspapers, magazines and other periodicals, radio or television where to send the participant's name and address to the promoter.

CONSIDERATION

- CONSIDERATION + CHANCE + PRIZE = Games of Chance or Lottery

CONSIDERATION

- CONSIDERATION + CHANCE + PRIZE = Sweepstakes

CONSIDERATION

- What does free mean?

CONSIDERATION

- What does free mean?

CONSIDERATION

- In some states, an alternative free method of entry will eliminate the element of consideration for a gambling analysis.

CONSIDERATION

- In some states, an alternative free method of entry will eliminate the element of consideration for a gambling analysis.
 - The free method must have "Equal Dignity" with methods associated with a purchase

CONSIDERATION

- In some states, an alternative free method of entry will eliminate the element of consideration for a gambling analysis.
 - The free method must have "Equal Dignity" with methods associated with a purchase
 - Equal dignity" means that there is equality among entrants with regard to four aspects of the sweepstakes:
 - (i) method of entry,
 - (ii) opportunity to win,
 - (iii) claiming prizes, and
 - (iv) prizes awarded

ELEMENTS BEYOND THE PLAYER'S CONTROL

PLAYER'S SKILL
ELEMENTS CONTROLLED BY THE PLAYER

CHANCE

- Gambling Instinct
 - * In a minority of states, the relative predominance of skill versus chance is irrelevant. In these states, courts merely look at the nature of an activity to determine whether it appeals to one's "gambling instinct." If an activity appeals to one's "gambling instinct," it is prohibited. Because this test is as subjective, and arguably more so, than the predominance test, court decisions vary widely in its application to particular games.

CHANCE

- Gambling Instinct

A photograph of a roulette table, showing the numbered pockets (0, 00, 1-36) and a red ball. The table is illuminated with colorful lights.

CHANCE

- Gambling Instinct

A photograph of a roulette table with a large pile of coins on it. The table is illuminated with colorful lights.

CHANCE

- Gambling Instinct

A photograph of a slot machine, showing the reels and the payout area. The machine is illuminated with colorful lights.

CHANCE

- Gambling Instinct

A photograph showing a person from behind, focused on playing a slot machine in a casino. The machine has a colorful display and a coin slot. The number '5' is visible on the machine's front panel.

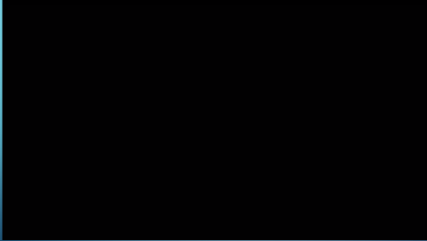

CHANCE

A photograph showing a person playing a slot machine. The machine's screen displays a colorful game with various symbols and lights. The person is seen from the side, looking at the machine.

CHANCE

- Material Element or Any Chance
 - In a few states, the relative predominance of skill versus chance is irrelevant. These states prohibit any payment for the opportunity to win something based on a game where chance has any role in determining the outcome. At times, older court opinions assessed games based on appealing to one's "gambling instinct," when any element of chance determined the outcome of an event.

CHANCE

- Class Example

CHANCE

- Tournament electronic golf machine
- Statistically, skill is clearly the dominant factor in winning.
 - Skill increases as players increase their frequency of play
 - Mathematical models show skill is clearly dominant in determining the outcome of a round of e-golf
 - All machines and components are kept in virtually the same condition.
 - If any part wears, becomes stuck or operates outside of tolerances the machine is tilted and player funds are returned.

CHANCE

- Tournament electronic golf machine
- Players pay an entry fee (\$100)
- Players play against other players on networked machines
- Tournament winners receive cash and other valuable prizes
- Machines located nation wide

CHANCE

- Play is based on trackball and button use

CHANCE

- What do you think?
 - Is it a game of skill or chance?

CHANCE

- Bruce M. Botelho, Attorney General May 22, 2001 –
 - A.G. file no: 663-01-0183

CHANCE

- Bruce M. Botelho, Attorney General May 22, 2001 –
 - Under Alaska law, crimes involving gambling depend on the statutory definition of "gambling" in AS 11.66.280. That definition excludes certain business transactions and charitable gaming. With some narrow exceptions (such as playing in a social game in a home), gambling means:
 - (1) staking or risking something of value, in other words, paying an entry fee or betting;
 - (2) to obtain something of value, in other words, to win a prize;
 - (3) based on
 - (a) a game or contest in which the outcome is dependent to a material degree on chance, even if skill is also a factor; or
 - (b) a future contingent event not under the player's control or influence.

CHANCE

- Bruce M. Botelho, Attorney General May 22, 2001 –
 - The final element in determining whether an activity constitutes illegal gambling turns on the concepts of skill and chance. As noted previously, gambling requires a contest of chance³ or a future contingent event. **Old Alaska case law held that illegal gambling required "where chance dominates the distribution of prizes even though such a distribution is affected to some degree by the exercise of skill or judgment." *Werner v. State*, 311 P.2d 127 (Alaska 1973).** In other words, the court held that for an activity to be considered gambling, chance must be the dominant factor, even if skill is material.

CHANCE

- Bruce M. Botelho, Attorney General May 22, 2001 –
 - **But in 1978 the Alaska Legislature specifically rejected the court's formulation in *Werner* and actually reversed the factors so that gambling occurs even if skill is the dominant factor, as long as chance is a material element. *State v. Journal*, Supp. No. 47, at 13-14 (June 12, 1978).** The Alaska Legislature adopted the commentary of the New York legislators, in noting that "despite the importance of skill in any game, [gambling] means (1) the outcome depends in a material degree upon an element of chance." 16.

CHANCE

- Bruce M. Botelho, Attorney General May 22, 2001 –
 - The Alaska Legislature made it clear that “Games of pure skill, e.g., chess, will not be considered gambling if the contestants bet against each other.” Senate Journal Supp. No. 47, at 112-14 (June 12, 1978). By contrast, although betting between chess players (i.e., those in control of the outcome) is not gambling, betting by onlookers is gambling. The reason for this, the legislature determined, was that “from the onlooker’s perspective, the outcome depends on ‘chance’ as he has no control over the outcome.” Id. The legislature thus recognized that the player’s control over the outcome of a contest is a critical element.

CHANCE

- Bruce M. Botelho, Attorney General May 22, 2001 –
 - With the golf machine, no player is guaranteed a prize. Indeed, the odds of winning a prize depend on both the player’s experience and the number and experience of other players who are also competing, perhaps in another city or another state. Although skill is important in a player achieving a high score, the scores achieved by all other players is a result that is completely out of the control of any particular player and not in any way dependent on that player’s skill. Thus, although playing the golf machine well is dependent on skill, winning a prize depends on other factors and, instead, on a material element of chance.

CHANCE

- Bruce M. Botelho, Attorney General May 22, 2001 –
 - Notwithstanding that the skill of the participants may be the predominant factor in achieving a high score on computer video-machines, we are of the opinion that the complex, adjustable, or non-adjustable nature of these devices, and lack of player control over the outcome, creates a material degree of uncertainty and chance as to whether the player will win a prize, which brings these devices within the ambit of Alaska gambling laws.

CHANCE

- Dominant Factor Revisited
 - Though many states use the "dominant factor test" many courts in those states have come to different conclusions regarding the analysis of the same games or events. For example, (i) both Massachusetts and Kansas have used the predominance test to assess the element of chance, yet the states disagree on the classification for the "crane game"; (ii) both Alabama and New Jersey have used the predominance test to assess the element of chance, yet the states disagree on the classification for backgammon; and (iii) both Nevada and North Dakota have used the predominance test to assess the element of chance, yet the states disagree whether skill or chance predominates in a hole-in-one golfing contest.
 - How do you explain these differences?

CHANCE

- Remember it is the whether the participants risking consideration are controlling the outcome of the event.
 - "Bona-fide contests of skill, speed, strength or endurance"

CHANCE

- Bob and Ray play chess and bet each other \$100 each on who will win...

CHANCE

- Bob and Ray play chess and bet each other \$100 each on who will win.
- They bet against each other with Michael, who will take \$110 from each of them and pay the winner \$210, keeping \$10 for his services

CHANCE

- Bob, Doug, Bill, Ted, Wayne and Garth also want to bet on the chess game between Bob and Ray. Bob, Doug, and Garth bet on Ray through Michael. Wayne, and Bill bet on Bob through Michael.
- Are Bob, Doug, Bill, Ted, Wayne and Garth's bets skill wagers?

CHANCE

- Client Alex T. wants to put coin operated networked trivia machines in bars with a game show theme.
- Players pay \$5 to enter an hourly round of trivia games.
- Each hour, the player with the highest score nationally wins \$100, to be paid out by the sponsoring bar.
- Client Alex T. is asking for a clean opinion, can it be provided?
- What risk reduction measures would you suggest?
